**WIA System**

**Programs Modified:**

**Log #5542                    EGRNT (Enter Grant Code Descriptions)**

Fix program to correct error on the grant group field. System no longer stops at the grant group field when user enters grnt\_gp = 54.

                              LWIR (Load WIA Application Form)  
                              EWIR (Enter WIA Application Form)**

Modify the Enter WIA Application program to check for consistency between highest grade complete and education status at time of enrollment. The extract load and entry will now require the education status = 2, 4 or 5 if highest grade complete >= 12 and education status = 1 or 3 if highest grade complete <12.

**Log #5518- 5524, 5526, 5527, 5528, 5530.**

The following programs were modified to expand the actvy\_serv\_cd to char (3) to allow the local areas the flexibility of tracking activities at a lower level and still rolling up for the required reports and performance. Adhoc reports may need to be changed to use the "LIKE" clause instead of "=" depending on the use of the actvy\_serv\_cd field. i.e. If the report matches or displays exact activity codes, then the "=" will still be used but if the report wants to report at the 2 character state activity codes, then the "LIKE" should be used."
